

News Release 29 – 25th May 2006

FieldSpec[®] 3, The Next Generation of Field Spectroradiometers

FieldSpec[®] 3, the next generation in field spectroradiometers, is now available in the UK through Analytik Ltd. With all of the power and functionality of FieldSpec[®] Pro, the benchmark for remote sensing spectroradiometry for many years, the all new FieldSpec[®] 3 offers significantly expanded functionality, including Ethernet and wireless connectivity for remote data collection at up to 50 metres distance from the computer. The FieldSpec[®] 3, with its more compact, rugged and lighter weight design, provides improved ease of handling in the field. FieldSpec[®] 3 also comes standard with several cable management options and increased built-in diagnostics, including the new ASD FiberChecker™ and detector stability indicators.

FieldSpec[®] 3 is a user friendly, field portable, precision instrument with a full spectral range from 350 to 2,500 nm and rapid data collection (100 milliseconds per complete spectrum). The new LabVIEW[®] interface expands the power and capabilities of the updated RS3™ software, enabling customisation and automation of data collection and ease of use for a wide variety of applications. The improved instrument design combined with the new wireless connectivity takes portability and flexibility to a higher level, allowing users to perform applications never before possible.

Analytik Ltd are UK based distributors for FieldSpec[®] 3 and other portable VIS/NIR spectroscopy solutions from Analytical Spectral Devices Inc. For a brochure on FieldSpec[®] 3 please contact:
