

News Release 38 – 23<sup>rd</sup> October 2006

## **Mobile Workstation for Portable VIS-NIR Spectrophotometers**

The new goLab™ mobile workstation, designed for quick and easy transportation of LabSpec® portable VIS-NIR spectroscopy systems is now available. Materials identification and quantification has never been more convenient, technicians and researchers are now empowered more than ever before to perform their analysis exactly where and when they need to. The goLab™ mobile workstation acts as a wheeled carrier for streamlining transportation between analysis sites, then acts as an ideal platform to perform your analysis right on the spot.

goLab™ features:

- Large wheels for easy transportation, even over rough terrain.
- Stable, non-slip platform for spectrophotometer, sampling device, laptop computer, battery packs and any additional accessories.
- Convenient and secured compartments
- Compatible with all current portable spectroscopy solutions from ASD.
- Compatible with many earlier portable spectroscopy instrumentation from ASD.
- Folds down for compact storage and shipping.
- Ideal for use indoors; for example in a goods inwards warehouse conducting through-the-bag raw material identification testing.
- Ideal for use outdoors; for example performing measurements in the field on soils, crops and vegetation.
- Reconfigurable velcro positioning for added security and flexibility.

More testing, when you need it, where you need it!
